
Table align right

Posted by nondos - 2009/06/01 20:25

Hello

Is it possible to align right the text in

ARI JDataTable

ARI JFlexGrid

ARI JTableSorter

ARI MooTable

?

also is it possible to align left the arrow sorting icons?

Thanks

Hello,

You can do it with help 'CSS Template'. Create new 'CSS Template' on the component backend with the following text:

```
/* DataTable plugin */
.dataTables_wrapper TABLE.display TD
{
    text-align: right;
}

.dataTables_wrapper TABLE.display THEAD TH
{
    padding: 10px 3px 10px 17px;
    background-position: left center;
}

/* TableSorter plugin */
TABLE.tablesorter TD
{
    text-align: right;
}

TABLE.tablesorter THEAD TH
{
    padding: 4px 4px 4px 17px !important;
    background-position: left center !important;
}

/* FlexGrid plugin */
.bDiv TABLE DIV
{
    text-align: right !important;
}

/* MooTable plugin */
TABLE.klonPadding TD DIV.cell SPAN
{
    left: auto !important;
    right: 5px;
}
```

Regards,
ARI Soft

How to proceed if I want to decide for each table I use on my site separate, which column should be aligned left center or right.

Is there an easier way than choosing alignment for each cell separate?

Thank you!
