Installation error - Notice: Undefined variable:

Posted by ronscale - 2009/06/29 17:24

_____

After installation i get the error: "Notice: Undefined variable: vd83a5a80 in /home/users/s/o/solarsel/public_html/solar-sell.nl/administrator/components/com_arismartcontent/kernel/Controllers/AriSmartContent/class.PluginController.php(18) : eval()'d code on line 1" and that 12 times.

On a local server there is no problem, only on the hosted server.

system did not find Licence key, plugins are not installed.

What is wrong?

_____

Hello,

It was bug, but we have fixed it. You can download updated component in 'Member Area'. Say, pleasem which version of MySQL on your hosting?

Regards,
ARI Soft

_____

I use MySQL 4.0.24 and News Pack v. 1.7.1 (downloaded 3 hours ago)

_____

ARI Smart Content requires MySQL 4.1+ because it uses utf-8 encoding.
