Not displaying anything at the front-end..

Posted by sumeet - 2009/06/30 13:02

_____

Hi I am new to this component/joomla

i have installed the smart content component and made a article with the following code: {arijcsv2table url="http://absolute path to file" select="1,2,5"}

and my file is in the root of the site.. still nothing at the front end...

Before it was showing the code as it is but now it doesn't showing anything....

Please help..

_____

Hello,

Indicate relative path from Joomla! root dir. For example, if csv.csv file is located in Joomla! root dir, use the following code:

{arijcsv2table url="csv.csv" select="1,2,5"}

PS: Check that you have generated license key for needed domain.

Regards,
ARI Soft
