
My ARI Accordion doesnt work

Posted by nicorey2001 - 2011/10/18 19:03

Hi

I installed the plugin, i tried to create an accordion, but it doesn't work. I just see the title, and the content, but i don't see any css style or javascript behavior to indicates an accordion.

I note, that you use a licence, but i didn't receive any license, and i don't see the licence tab in the component.

What i must to do, please, help me.

Hello,

Could you provide a link to a page where we can see the problem? It can be a conflict with a 3rd party extension.

PS: Do you use any other our extension(s)?

Regards,
ARI Soft
