
How to use

Posted by ahessels - 2011/11/09 17:52

Hello,

I've bought smart content, installed the component/plugins and then....!
The client is interested in Magnifier, Tabview and the thumbnail plugin.
All plugins are enabled, but how can I make f.e. the tabview working?!

A plugincode normally is put into the textfield of an article but the copied code is just shown as content!

A small manual of it, would be nice...! Or why I can't get the plugin working. HOw to setup content for the tab, etc etc...

site is www.camerastuffreview.com

Hello,

Check please that "System - ARI Smart Content" is enabled. If you use a WYSIWYG editor, switch it to plain text mode before inserting plugin code because WYSIWYG editors can add extra HTML code in design mode.

PS: Video tutorial how to use "ARI JTabView" plugin can be found [here](#).

Regards,
ARI Soft

I gonna try it.

Are there for the other plugins also such video manuals...?
