arifancythumb joomla 1.7: Only 1 image [SOLVED]
Posted by GDShiell - 2011/11/12 13:50

─────────────────────────────────────

I have copied the code from a Joomla 1.5 installation to a new 1.7 system, and only the first image appears.

A sample of the code is:

{arifancythumb src="images/stories/Bellver/grapes main.jpg" srcSmall="images/stories/Bellver/thumbs/grapes thumb.jpg" title="Still Life with Grapes - Oil - 30cm x 19cm (+Frame) - Ðˆ695" group="Bellver"} {arifancythumb src="images/stories/Bellver/cork main.jpg" srcSmall="images/stories/Bellver/thumbs/cork thumb.jpg" title="Still Life with Cherry - Oil - 30cm x 19cm (+Frame) - Ðˆ695" group="Bellver"}

The 1.5 version can be seen at http://www.greensandblues.co.uk/

The 1.7 version is on a localhost server running wamp so is not accessible.

─────────────────────────────────────

Hello,

Sorry, but provided page doesn't contain "ARI JFancybox" plugin. In any case could you upload J! 1.7 site to an online server and provide a link to a page where we can see described problem?

Regards,
ARI Soft

─────────────────────────────────────

I have found the solution as a result of a reply to another problem that I was having.

The solution is to insert a space before the closing } bracket in the plugin code. There is a known bug involving plugin code which contains the " character.

See http://forum.joomla.org/viewtopic.php?f=615&t=673059&p=2667992#p2667992 for the full explanation.
