
Problem with JData Visualizer

Posted by latino - 2011/12/11 01:37

Hi:

I am having trouble with JData Visualizer. See:

<http://www.politicaboricua.com/Resultado-Historico-Gobernador/resultados-elecciones-yauco-1992-2008.html>

Axxis labels are not being shown.

Please help, this affects hundred of charts I have created.

TIA

B)

Hello,

This problem with site template styles. Add the next CSS rules to fix it:

```
DIV.arijdatavisualizer UL.visualize-labels-x LI,  
DIV.arijdatavisualizer UL.visualize-labels-y LI,  
DIV.arijdatavisualizer UL.visualize-key LI  
{  
  overflow: visible;  
  background-image: none;  
  padding-left:0;  
}
```

Regards,
ARI Soft
