External Search Module does not work when ARI JDat
Posted by agsmitha - 2009/08/13 16:21

_____

External Search Module does not work when ARI JDatabale in enabled on my tables.
I have a Client Login and Ajax Search module on my page. These do not work when I enable the JDataTable on the page.
Is there a solution? Please help.

Thank you.

_____

Hello,

Could you say link where we can see this issue? It helps us provide solution.

Regards,
ARI Soft

_____

http://tdudevtest.com/QA/class-schedule
The Client Login and Ajax Search module at the top don't work as the sort and filter is enabled on the tables on the page.

Thank you.

_____

Set 'No conflict' option to 'Yes' on 'ARI JQuery Loader' plugin settings page. It should help.

Regards,
ARI Soft
