
arijfancybox question

Posted by domc - 2012/01/04 07:51

Hi there and happy new year.

I've put an field within my fancy box.

I'd like to submit the form for the page when the fancy box is closed AND the fancy box input field contains a value.

I'm sure this must be possible with a simple javascript line, but I'm not sure how to do this (and what event to reference for the closure of the box).

Any help much appreciated.

Cheers, Domc

Hello,

Happy New Year. Could you provide a link to a page where we can see fancybox with described form?

Regards,
ARI Soft

Hi there

Unfortunately the site is on my local drive for development. I've tried to post some more info about what I'm trying to do, along with an image but I can't get the image upload to work, so I've sent an email instead with the additional information to the info@ari-soft.com address.

Any help much appreciated.

Kind regards, Domc

The next javascript code can be used to close fancybox:

```
jQuery.fn.fancybox.close();
```
