## Jdialog & iframe

Posted by komodo25 - 2012/01/07 00:22

---

hello admin

why the update botton dont works, when I try to edit my info in community builder?

by ei: im using a iframe to show the community builder user edit page, inside a Jdialog pop up

the pop up works ok, but when I try to update the info clicking the update bottom nothings happen

any solution to this?

-----

Second issue

also what I'm trying to do is make it so when the user hits 'update', it will close Jdialog pop up, and then refresh the profile page.

Hello,

Where we can see the issues?

Regards,  
ARI Soft
