## (SOLVED) Install additional JQuery themes?

Posted by babben - 2012/02/22 11:18

---

Hello!

Is it possible to install additional themes from <http://jqueryui.com> to use for the ARI JQuery UI Loader? I downloaded an copied one of their themes to `/plugins/content/arismartcontent/system/ari_jquery_ui_loader4d628085e67c6/js/1.7.2/themes/mynewtheme` but without success.

Hello,

Could you explain what exactly doesn't work? New theme is not shown in "ARI JQuery UI Loader" plugin settings? Is it not applied to a table? Could you archive "mynewtheme" folder and send it by email?

Regards,  
ARI Soft

I use Ari Jdatatable and Ari CSVtable with CSV-file:

```
{arijdatatable bAutoWidth="false" iDisplayLength="100"}{aricsvtable file="images/stories/csv/mycsv.csv"}  
{aricsvtablecolumns}  
{aricsvtablecolumn id="amne" width="100px"}{/aricsvtablecolumn}  
{/aricsvtablecolumn} {/aricsvtablecolumns}  
{/aricsvtable} {/arijdatatable}
```

There are 3 pre-installed themes I can change in the ARI JQuery UI Loader settings.

I have downloaded theme from <http://jqueryui.com>, version 1.7.3 (Legacy release, for jQuery 1.3.2)

I unzip it ad copy the content of `/css` in the package - a folder with images and a `.css` file, to `/plugins/content/arismartcontent/system/ari_jquery_ui_loader4d628085e67c6/js/1.7.2`

I then change the Default jQuery UI 1.7.2 theme to the new theme in the ARI JQuery UI Loader settings.

The table show up but no header and footer -no images are displayed.

If you create folder "mynewtheme" rename CSS file to `mynewtheme.all.css`
