

Not presenting all data

Posted by smitjer - 2012/03/06 10:27

Hi!

I am want get 5 columns of data back... I also tried this in phpmyadmin and there it works flawless. But when placing this code in joomla in an article than i just get 3 columns (jos_prijzen_omschrijving, jos_prijzen_dagprijs, jos_prijzen_weekprijs)... Also the headings are not shown.

Could you please help me out?

Thanks

```
{arjtablesorter paging="true"}
{aristable}
```

```
{aristablecolumns} {aristablecolumn id="jos_prijzen_omschrijving" alias="ID1" width="20%" className="idg"}
{aristablecolumn id="jos_prijzen_bols_dagprijs" alias="ID2" className="idg"} {aristablecolumn
id="jos_prijzen_bols_weekprijs" alias="ID3" className="idg"} {aristablecolumn id="jos_prijzen_dagprijs" alias="ID4"
className="idg"} {aristablecolumn id="jos_prijzen_weekprijs" alias="ID5" className="idg"} {aristablecolumns}
```

```
{aristablequery}
```

```
SELECT jos_prijzen.omschrijving, jos_prijzen_bols.dagprijs, jos_prijzen_bols.weekprijs, jos_prijzen.dagprijs,
jos_prijzen.weekprijs FROM jos_prijzen_bols JOIN jos_prijzen ON jos_prijzen_bols.omschrijving =
jos_prijzen.omschrijving
```

```
WHERE jos_prijzen.omschrijving LIKE 'aggre%'
```

```
{/aristablequery}
```

Hello,

Try the next code:

```
{arjtablesorter paging="true"}
{aristable}
{aristablequery}
SELECT
P.omschrijving,
B.dagprijs,
B.weekprijs,
P.dagprijs,
P.weekprijs
FROM
#__prijzen_bols B INNER JOIN #__prijzen P
ON B.omschrijving = P.omschrijving
WHERE
P.omschrijving LIKE 'aggre%'
{/aristablequery}
{/aristable}
{/arjtablesorter}
```

If it doesn't help provide screenshots of "ARI SQL Table" and "ARI jTableSorter" plugins settings page or a temporary access to your J! backend by email so we can investigate an issue.

Regards,

=====
