
display image thumbnail in ari tables and sort

Posted by sbi - 2012/04/04 16:03

I would like to display the actual image thumbnail instead of the file name. You can view here (<http://readyssettest.yousaygo.com/jessytest>) .. you may have to sort by file name to see. Also, is there a simple way to show only dates from today forward and sort chronologically?

This is what I have in the ARI Smart Content module:

```
{arijdatatable bPaginate="true"}
{arisqltable}
  {arisqltablecolumns}
    {arisqltablecolumn id="Image" alias="" }
    {arisqltablecolumn id="Event" alias="Event"}
    {arisqltablecolumn id="Date" alias="Date"}
    {arisqltablecolumn id="Time" alias="Time"}
    {arisqltablecolumn id="Venue" alias="Venue"}
  {/arisqltablecolumns}
  {arisqltablequery} SELECT ev_image AS Image, start_date as Date, start_times as Time, event_name AS Event,
venue_id AS Venue FROM #__evo_events {/arisqltablequery}
{/arisqltable}
{/arijdatatable}
```

=====

Hello,

Could you specify a path to a folder where images are stored?

Try the next code:

```
{arijdatatable bPaginate="true"}
{arisqltable}
  {arisqltablecolumns}
    {arisqltablecolumn id="Image" hidden="true"}/{/arisqltablecolumn}
    {arisqltablecolumn alias=" " virtual="true" pos="-1"}
    {coltemplate}/{/coltemplate}
  {/arisqltablecolumns}
  {arisqltablequery}SELECT ev_image AS Image, start_date as Date, start_times as Time, event_name AS Event,
venue_id AS Venue FROM #__evo_events{/arisqltablequery}
{/arisqltable}
{/arijdatatable}
```

This helped a lot, thanks!

Where would I modify the size of the thumbnail? Is it possible to use other ARI smart content features such as Jzoom or thumbnail?

Try to use the next code:

```
{aristablecolumn alias=" " virtual="true" pos="-1"}
    {coltemplate}{arifancythumb src="administrator/components/com_evo/images/event/icon/{"$Image}"
thumbWidth="75"}{/arifancythumb}{/coltemplate}
{/aristablecolumn}
```

instead of:

```
{aristablecolumn alias=" " virtual="true" pos="-1"}
    {coltemplate}{/coltemplate}
{/aristablecolumn}
```
