
help with sInfoEmpty

Posted by sbi - 2012/04/23 00:01

The following has worked successfully on a separate server with data in the tables, however I am having trouble getting the oLanguage_sInfoEmpty to work properly.

What am I missing? Should I be using oLanguage_sZeroRecords instead?

```
{arijdatatable bPaginate="true"; iDisplayLength="5"; sPaginationType="full_numbers"; bAutoWidth="false";
oLanguage_sInfoEmpty="No events to display."}
{aristable }
{aristablecolumns}
{aristablecolumn id="Image" hidden="true"}{/aristablecolumn}
{aristablecolumn alias=" " virtual="true" pos="-1"}
{coltemplate}{/coltemplate}
{/aristablecolumn}
{/aristablecolumns}
{aristablequery}SELECT ev_image AS Image, start_date as Date, start_times as Time, event_name AS Event,
venue_id AS Venue FROM #__ysg_events WHERE vid = {/aristablequery}
{/aristable}
{/arijdatatable}
```

Hello,

Use the next code:

```
{arijdatatable bPaginate="true" iDisplayLength="5" sPaginationType="full_numbers" bAutoWidth="false"
oLanguage_sZeroRecords="No events to display."}
{aristable}
{aristablecolumns}
{aristablecolumn id="Image" hidden="true"}{/aristablecolumn}
{aristablecolumn alias=" " virtual="true" pos="-1"}
{coltemplate}{/coltemplate}
{/aristablecolumn}
{/aristablecolumns}
{aristablequery}SELECT ev_image AS Image, start_date as Date, start_times as Time, event_name AS Event,
venue_id AS Venue FROM #__ysg_events WHERE vid = {/aristablequery}
{/aristable}
{/arijdatatable}
```

Regards,
ARI Soft

Thanks for the reply,

It's still not showing a table at all. <http://yousaygo.com/what/venue-2>

Thanks!

The message is shown if a table contains data, but a user enter a search string in "Search" textbox and it return 0 records. In your case the table doesn't contain data and it is not rendered.
