
Plugin doesn't work on Virtuemart 2.0

Posted by Seichinha - 2012/07/05 21:57

Hello

I want to ask if there's anyway to Smart Content plugin's work on Virtuemart product details. I've enable the use of joomla plugins on Virtuemart but it doesn't work.

Thank you

Hello,

Check that "System - ARI Smart Content" plugin is enabled and set "All components" parameter to "Yes" in plugin settings.

Regards,
ARI Soft

Hi

I was not aware that we could do that.
I didn't enable to all, but only adding "comp_virtuemart" on Components parameter and works perfectly.

Thank you for the support.

Best regards

Hello,

You can use "System - ARI Pretty Photo Anywhere" plugin in product description. Just set "Mode" parameter to "Anywhere" in plugin settings.

Regards,
ARI Soft

I have set the plugin to anywhere, it still doesnt have any effect on the images on the site.

Where should i put the {ariprettyphoto} tag?

And i have read the guides and the forum.

What effect do you want to achieve? Use the plugin description or use pretty photo for existing images? Could you provide a link to a page where do you want to use the extension?

Basically I want the photos to pop up in the lightbox with their title showing.

here is a link to the product page.

#link

Do you want to use the lightbox for existing images or add some images to product description?

Posted by simplesolution - 2013/04/24 06:52

I want to use the lightbox on the existing images under the product images, not the description.

You can use "System - ARI Pretty Links" plugin from "ARI Pretty Photo" package. Set "Elements CSS selectors" parameter in plugin settings to the following value:

"#products #carousel LI A"

Regards,
ARI Soft

Yes now the lightbox show up, however it also work on the big picture so instead of one big they are now all small thumbnails.

Is there a way to avoid that?

Re:Plugin doesn't work on Virtuemart 2.0

"ARI Pretty Photo" is not used on the page.

Regards,
ARI Soft

No i am sorry, i had disabled it to do some work.

I apologize, pretty links and pretty photo is now active on the page.

Javascript error occurs on the page so the slider doesn't work. This problem with VirtueMart theme and site template. They can't work properly when several jQuery instances are loaded. Disable loading of jQuery library in "ARI Pretty Photo" module/plugins and in VirtueMart.

Regards,
ARI Soft

Re:Plugin doesn't work on Virtuemart 2.0

I have disabled the jquery in all of the plugins, and the lightbox appear with the title of the relevant image, however it shows an iframe of the site instead of the picture.

Re:Plugin doesn't work on Virtuemart 2.0

The slider which is used for thumbnails remove path to original images from tags and replace it with the following values href="#1", href="#2" and etc. so "ARI Pretty Photo" can't show the images.

Is this something that will affect all products? and is this something you can do? I am willing to pay for it.

If you want to use the extension with the slider which is currently used on products pages, it is not possible due to the reason which we described in our previous post.
