
Only code is visible in Frontend

Posted by clioschrotter - 2010/01/12 07:50

Hello,

I use some plugins from "ARI Smart Content: DataTable Pack" and it works great so far.
However, on my PC and most others the tables are shown correctly, but on three PCs of a friend (Home PC, Notebook, Office PC) he only can see the plugin code in the frontend.

Any idea why he can't see the right content?

Kind regards,
clioschrotter

Hello,

Maybe you don't have licence code for domain which your friends type in browser for opening your site?

Regards,
ARI Soft
