
Table Sorter Syntax Problem

Posted by hgdata - 2012/09/01 10:06

Hi!

I tried to use ARI Table Sorter but it does not work. :(

I installed the Joomla! Module and used the default settings!

Can somebody help me what I did wrong or what mistakes I made?

I would like to sort all columns in two tables.

<http://www.ohseurope.com/prep-statistics-2>

Thanks for your support! <http://www.ari-soft.com/images/fbfiles/files/Prepstat.txt>

Hello,

You bought "ARI Data Tables" module, it is not the same as "ARI Smart Content" extension and "ARI JTableSorter" plugin from the extension.

We sent by email the plugin which help to convert your HTML tables to "TableSorter" or other table widget supported by "ARI Data Tables" extension.

Regards,
ARI Soft
