
No caption at axis with ARI JData Visualizer

Posted by clioschrotter - 2010/01/29 15:25

Hello,

I just tried ARI JData Visualizer with the following code:

```
{arijdatavisualizer type="line" hideTable="true" legendPos="right" lineWeight="2" width="400" height="300"}
```

Schnittverlauf seit 2005

05/06
06/07
07/08
08/09
09/10

Michael

190,51
190,98
195,67
197,33
199,31

Nico

175,05
169,03
167,39
170,92
179,27

Oliver

191,87
175,04
189,38
183,71
182,56

```
{/arijdatavisualizer}
```

It now shows me a line chart and the legend on the right side but NO numbers or text at x- and y-axis. It also doesn't work with a bar char.

How can I solve this?

Kind regards,
clioschrotter

Hello,

Could you provide link where we can see this issue?

Regards,
ARI Soft

I just realized that this issue only happens in mod_arismartcontent, means when I use the module.
When I paste the code in a document it works...

Create 'CSS Template' or use existing 'CSS Template' in 'CSS Templates' section on the component backend and add the following rule, please:

```
.arijdatavisualizer-right
{
    padding: 20px;
}
```

It should help.

I'm afraid it didn't help.

Maybe you can have a look by yourself. I provide you acces to the backend end send you a mail.

Kind regards,
clioschrotter

Hi,

I could solve it by myself.
I additionally wrote

```
.arijdatavisualizer-top
{
  padding: 25px 0 0 35px;
}
```

in CSS Template and now it works.

Thank you for yor help.

Kind regards,
clioschrotter

Hello,

It seems that you have changed labels position, in your previous example it has 'Right' direction.
