Hi,

I have un big problem with my template (JA-Opal).

When I use ja-slideshow2 (or Rokslidewhow or Gavick news image or JV slideshow(flash)) and arijdatasorter, a conflict appears ... the slideshow(s) does not work ???

What's happens ?

Thanks

Hello,

It can be conflict between javascript libraries, provide link, please, where we can see this issue and we'll investigate it and provide solution.

Open 'ARI JQuery Loader' plugin settings page on the component backend and set 'No Conflict' option to 'Yes'. This should help.
