Change scale ARI JDATA VISUALIZER

Posted by clioschrotter - 2010/02/12 16:57

_____

Hello,

is it possible to change the scale of the chart? Right now it starts with 0 and ends with 199. The values (9) shown are between 140 and 199 so they are displayed overlapping in the upper 20% of the chart. You can see it on Phoenix Viernheim

I would like to have the chart scaled from 120 to 200 e.g.

Is this possible?

Kind regards,
clioschrotter

Hello,

Unfortunately plugin doesn't support this ability, but you can submit feature request here and we'll this possibility in the next version.

Regards,
ARI Soft
