
CSS templates

Posted by kevdigital - 2010/03/14 05:16

I am new to Joomla but love the way the system is put together and the Ari-soft plugins.

I am having a major issue understanding how to link the custom CSS files to a module created or an Article.

Is there a simple step by step tutorial I can look at.

Or is there another way to link to a CSS file as I would rather not edit the core CSS in ari-soft

Thanks in advance

Kevdigital

Hello,

Only create and enable CSS template and the component includes it to page when requires.

Thanks for the quick reply but I am still at a loss.

I created a CSS template.

I can see it in the list

But how do I associate that to an Ari module or article I make

Any step by step documentation with screen shots.... I will be happy to create this document once I understand it as it must be needed for beginners like me

thanks

CSS templates including doesn't require additional steps. Only create and enable CSS template(s). The component load active CSS templates automatically.

Is there a naming convention I need to adhere to?

I created a CSS called frontfade jut so I know it was for the fade on the front page?

Is this correct? if not/ does it matter?

If I create multiple CSS how does the plugin know which one to choose.

sorry for the simple questions but I can't find the answers in any documentation or tutorials.

No need any naming convention. The component load all active CSS templates when a plugin from "ARI Smart Content" is used on a page.

i active a css abd use ARI jTableSorter:

```
/* tables */
table.tablesorter {
  font-family:arial;
  background-color: #CDCDCD;
  margin:10px 0pt 15px;
  font-size: 8pt;
  width: 100%;
  text-align: left;
}
table.tablesorter thead tr th, table.tablesorter tfoot tr th {
  background-color: #e6EEEE;
  border: 1px solid #FFF;
  font-size: 8pt;
  padding: 4px;
}
table.tablesorter thead tr .header {
  background-image: url(bg.gif);
  background-repeat: no-repeat;
  background-position: center right;
  cursor: pointer;
}
table.tablesorter tbody td {
  color: #3D3D3D;
  padding: 4px;
  background-color: #FFF;
  vertical-align: top;
}
table.tablesorter tbody tr.odd td {
  background-color:#F0F0F6;
}
```

```
table.tablesorter thead tr .headerSortUp {
  background-image: url(asc.gif);
}
table.tablesorter thead tr .headerSortDown {
  background-image: url(desc.gif);
}
table.tablesorter thead tr .headerSortDown, table.tablesorter thead tr .headerSortUp {
  background-color: #8dbdd8;
}
```

but the css doesn't work?
Many Thanks

Hello,

Could you provide link to page where we can see this issue?

Regards,
ARI Soft

'ARI JDataTable' plugin is used on this page. If you want that 'ARI JDataTable' looks like 'ARI JTableSorter', read this post, please. If you need something another, explain it, please.
