css / theme not working
Posted by nvanstrien - 2012/12/02 14:18
_____

Hi,

I upgraded to Joomla 2.5.8 (security release) from 2.5.7 and somehow I think it broke the formatting of tables which I created with the samert content plugin. I have already checked to see that the plugin is installed and enabled. This seems to be the case.

Any suggestions where I can look for a solution?

Thanks,

Niels

example of a table rendered in a module, not formatted with css/theme:

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
