
Problem for sorting numerical column

Posted by cbron - 2013/01/21 14:17

All the other columns work well except those with numerical values...???
I'm using an external SQL Database...

Could you help me to understand what's happening...?

Thanks. <http://www.ari-soft.com/images/fbfiles/images/Capture-6d45fbe44ea1bd016a7e1e317e5e5c25.PNG>

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft

Sorry for the bad link...I opened the site just for few hours...(for you)

http://swissdams2.epfl.ch/index.php?option=com_content&view=article&id=215&Itemid=525&lang=fr

Let me know when I can close it again...thanks in advance...

Some values of "Capacity" column contains empty values so the widget sorts values of the column as strings, not as numbers. Use 0 instead of empty values, it should help or use more powerful table widget like "ARI Data Table".

Ok...thanks for your help.

Kind regards.
