
Help with Hyperlink

Posted by tmediacom - 2013/01/22 22:23

Hello -

I am using the following code to display name and website from mySql table and hoping to hyperlink website to customers website:

```
{arjdatatable}
{arjsqltable}
  {arjsqltablecolumns}
    {arjsqltablecolumn id="name" alias="Company Name" width="30%"}
  {/arjsqltablecolumn}
    {arjsqltablecolumn id="website" alias="Website URL" width="70%" format={$columns:website}}
  {/arjsqltablecolumn}
  {/arjsqltablecolumns}
  {arjsqltablequery}
SELECT name,website
FROM dealerships
  where website > ' '
  {/arjsqltablequery}
{/arjsqltable}
{/arjdatatable}
```

The data is retrieved however the hyperlink doesn't work.

Thanking all in advance for any assistance with this issue. :(

Hello,

Hello,

The plugin code is incorrect. {arjsqltablecolumn} tag doesn't support "format" attribute. Use the following code:

```
{arjdatatable}
{arjsqltable}
  {arjsqltablecolumns}
    {arjsqltablecolumn id="name" alias="Company Name" width="30%"}{/arjsqltablecolumn}
    {arjsqltablecolumn id="website" alias="Website URL" width="70%"}
      {coltemplate}{$website}{/coltemplate}
    {/arjsqltablecolumn}
  {/arjsqltablecolumns}
  {arjsqltablequery}
SELECT name,website
FROM dealerships
WHERE website > ' '
  {/arjsqltablequery}
{/arjsqltable}
{/arjdatatable}
```

Regards,
ARI Soft

Hi and thank you for your reply.

Is it possible to have the hyperlink open in a new page less address bar and scrollbars.

This is an example of what I am trying to accomplish from another application:

```
SELECT  
``  
FROM sheet4  
WHERE `Industry` LIKE '%Restaurant%'  
AND `WEB` > ''
```

Thanking you in advance for your assistance.

Use the following code:

```
{coltemplate}{$website}{/coltemplate}
```
