
Mootable

Posted by dodu.petrescu - 2013/01/31 08:41

Hi,

What are the default values for mootable? I have a problem, the plugin appears and vanishes after 1 milisecond

<http://www.umf.ro/index.php/ro/component/content/article/958.html>

Hello,

Add the following CSS rules:

DIV.mootable_container

```
{  
  overflow: visible;  
}
```

DIV.mootable_container .mootable

```
{  
  position: relative;  
}
```

Regards,
ARI Soft

Disable MooTools loading in "ARI MooTools Loader" plugin settings.

Thank you, but now sometime it goes into error 404 page and if it loads it only displays 2 px height bar that a user needs to drag inorder to see the table. The height is set to 400 and it has no effect

P.S. In IE 9.0 you can not drag the bar at all

I found the css file and manage to do that directly from the file. Now the only problem left is that when a user clicks on the cols.gif the mini pop-up is under the table
