
I don't know how to use smart content

Posted by yannick33 - 2010/04/07 09:20

Hello, i'm french so sorry for my english:)

I can not use a plug-in smart content.

For example, I created a Smart Content Module and I put this code:

```
{arijaccordion animated="bounceslide"}
  {arijaccordionitem title="Hello"}
    Hello all
  {/arijaccordionitem}
  {arijaccordionitem title="ARI Soft"}
    Powered with ARI Smart Content plugin
  {/arijaccordionitem}
{/arijaccordion}
```

And the result is the picture i attached.

I read a lot of information on the use of plug in but I still do not understand. Sorry for the inconvenience. <http://www.ari-soft.com/images/fbfiles/images/ScreenShot00037.jpg>

Hello,

Provide your order number and license key by email, please.

Regards,
ARI Soft

Thanks for information, could you provide link where we can see this issue? If it's private, you can provide it by email.

Regards,
ARI Soft

I'm sorry but this is not possible because I am trying to develop the site locally using as virtualhost cd3w.biz

I do not have access to the domain name for now.

I do not know how to give access to the backend of Joomla.

Have you got an idea?

regards.

In this case, send screenshot of 'License' page on the component backend, please, and HTML source of the page where you see this issue.

Regards,
ARI Soft
