
Fatal Error

Posted by barracm - 2013/03/19 18:30

<http://www.ari-soft.com/images/fbfiles/files/GlenEchoECD.zip> I am getting the following memory error.

Fatal error: Allowed memory size of 67108864 bytes exhausted (tried to allocate 3932160 bytes) in /home/barracm/public_html/plugins/content/arismartcontent/content/ari_jdatatable510c8986697b3/ari_jdatatable.php on line 62

The spreadsheet used to work (360K), but I have loaded a bigger version (590K). Another spreadsheet (same format, less content, 220K) works fine.

PHP info gives

PHP Version 5.3.15
memory_limit 256M 256M

I have attached the file that fails.

Your assistance would be much appreciated.

Hello,

You can try to use PHP Settings plugin to increase value of "memory_limit" PHP parameter.

Regards,
ARI Soft
