
{arijtablesorter} not sorting?

Posted by rberkness - 2013/03/22 23:21

Hello, I've installed the plugins (from the ARI Smart Content Package), and I can't seem to get this table to sort.

The plugin is activated, because it's adding the zebra function, but there's no sorting arrows at the tops of the columns.

Here's the site: <http://qsox.cloudaccess.net/application-recommendations>

Let me know what I need to do to get this working.

Thank you!

Hello,

Could you provide plugin code which you use and screenshot(s) of "ARI jTableSorter" plugin settings page?

That worked!

Can I have it presort the first row automatically?

Use the following code:

```
{arjtablesorter notSortableCols="1,2,3" defaultSorting="0:DESC"}

Thank you! I switched it to:

```
{arjtablesorter notSortableCols="1,2,3" defaultSorting="0:ASC"}
```

so it would sort alphabetically A-Z.

It now works great!

Thank you again!
