Unable to register \'ARI Smart content\' package
Posted by Zinzuvadia - 2010/04/23 14:04
_____

But sir,

How to generate the testing key for local host domain.??

And whats the additional or prolonged testing license???

Thankx for the quick and kind support..

Again plz.. reply soon.. :)

_____

Go to 'Member Area' on our site, under the user who bought the component, type 'localhost' in domain field and generate license. The system generate testing license for 3 weeks time period, but if you need it for more long period, let us know and we'll provide it for you. Find screenshot with instructions in attach, please.

Hi Sir,

I have got the testing license key..

Package installed successfully in my local host.

Now.. again stuck at a point..

Yesterday you suggested me a plugin for news and testimonial.. that is..ari-jeasyslider

As your page descriptions, its a free plugin for ari-smart content...

I have downloaded that plugin. Tried to install it from install/uninstall (joomla 1.5).... but got an error as following:

Installation package does not contain xml file.

What to do now..???

This is the plugin for which i have bought your smart content package... plz help me...

If you unzip plg_arijeasyslider.zip file, you can find readme.txt file which contains instructions how to install the plugin.

_____

Sir,

I have successfully implemented the tool..

Working perfectly...

Now can you plz tell me... Whts the difference between auto and contineous parameter in jeasy slider..???

==

Re:Unable to register \'ARI Smart content\' package

Posted by admin - 2010/04/23 16:14

_____

Use 'auto' parameter if you want to enable auto rotation of slider items. When 'continuous' parameter is used, the plugin will show the fist item if an user clicks the next button when the last item is shown.

Regards,
ARI Soft

_____

Sir..

The slider effect is not same exacly as i want...

I want to keep the rotation contineous...

Conineous means....
Suppose.. I have 3 topics...

rotation is done as per following order...:

1 > 2 > 3

Now.. when rotation reaches at end on topic 3... then it jumps to 1st topic in reverse direction...

I don't want this reverse direction to happen..

I want to keep this direction contineous.. I mean.. the topic should not jump from 3rd to 1st in reverse direction.. but it should be contineous..

Same as following link.. This link has first example which i want in this moudle...

http://www.dynamicdrive.com/dynamicindex2/crosstick.htm

Plz help me.. sir.. I will be in big trouble, if i can not do this..

plz..

Sorry for delay, sometimes we need to sleep :) Currently 'ARI JEasy Slider' can't slide items in way which you need, but we add this ability within 48 hours.

Regards,
ARI Soft

Oh.. I am really sorry sir..

I posted these many posts cause.. I have founded admins status as online..

No poblem at all.. thank you very much for this great support..

But sir..

plz fulfill my requirement as I described you cause its very very urgent for me...

If possible plz try to solve the problem before 48 hours as its not possible for me to hold development this much time...

Hope..for the quicker response....

Thank you
Mohit

_____

We have updated the plugin. Now it contains new parameter 'Opposite', set this parameter to 'No' and 'Continuous' parameter to 'Yes' that the slider rotates items in unlimited way. You can download updated plugin from plugins repository.

Regards,
ARI Soft

_____

Hello,

we need a license for localhost for a longer time period then 3 weeks.
Best would be for ever.

Best regards
Michael
