Thanks for your quick reply, but the path you suggest is not present in my server.  
I copied the bugfix in: /plugins/content/arismartcontent/content/ari\_jnews\_slider4baf3941f2f42/js  
it did got better, but not enough  
Looking forward to hearing from you  
Best regards

Add the following code to 'CSS Template':

```
.navContainer
{
width: 100% !important;
text-align: center;
}

body .ariNewsSlider .navContainer ul
{
float: none;
display: -moz-inline-stack;
display: inline-block;
zoom: 1;
*display: inline;
}
```

Unfortunately I have another problem.  
Everything works fine but when loading the tables on "N" does not work anymore and the page remains white. Can you help me again?

I added a table and tried on different browsers:  
Explorer 8 - does not work;  
Firefox - 3.6.3 does not work  
Opera - not working  
Google Chrome - does not work

I again turned off JDatatable. The table does not load in "N" "Classe Quarta" and "Classe Quinta" in any position on the insert.
