Problem with JAccordion
Posted by bettyheim - 2013/05/02 21:23

_____

Hello,
I have a page with the JAccordion installed along with another module for a slide show called fancy transition slideshow.
The JAccordion is not working on this page. All elements are in the open state. I activated JAccordion on another page
and it seems to be working as expected. Can you help me to determine where the conflict is?
The page with the problem is http://apexmanagementpartners.com/index.php.
thank you,
Betty

_____

Hello, I have resolved this issue. I downloaded another extension: jQuery Easy. This extension has resolved the conflict.
