## Data Table Configuration

Posted by waynejb - 2013/05/16 17:02

---

Ok, I have shocked my brain to no end. Looking for ability to turn on and off columns of a CSV file into arijdatatable. Also need filtering via drop down for each column.

This:

```
{arijdatatable}
{aricsvtable file="testri.csv" limit="150"}
{aricsvtablecolumns}
{aricsvtablecolumn id="name" alias="Participant" headerClassName="head" virtual="false"}
{aricsvtablecolumn id="race-no" alias="Bib" headerClassName="head"}
{/aricsvtablecolumn}
{/aricsvtablecolumns}
{/aricsvtable}
{/arijdatatable}
```

Does the same as:

```
{arijdatatable}
{aricsvtable file="testri.csv" limit="150"}
{/arijdatatable}
```

<http://results.snapregistration.com/>

Any help appreciated.

Hello,

Use the following plugin code:

```
{arijdatatable}
{aricsvtable file="testri.csv" limit="150"}
{aricsvtablecolumns}
{aricsvtablecolumn id="name" alias="Participant" headerClassName="head"}{/aricsvtablecolumn}
{aricsvtablecolumn id="race-no" alias="Bib" headerClassName="head"}{/aricsvtablecolumn}
{/aricsvtablecolumns}
{/aricsvtable}
{/arijdatatable}
```

Regards,  
ARI Soft
