
ari jtooltip plugin

Posted by jakep08 - 2010/05/04 06:15

I recently purchased ARI Smart Content. I am trying to use the jtooltip plugin that comes with it. I have it working on my site at places with text but I am trying to include a graphic within the tooltip. Is this possible?

Hello,

We have updated 'ARI JToolTip' plugin. Download and re-install the component, please. After this you can enter HTML code in tooltip. For example, you can place necessary images with help HTML tag.

Regards,
ARI Soft

Wow! That was fast! Thank you!

Could you please point me in the right direction as to where I can download the updated plugin...or do I need to download the entire package again. I don't see it in the plugin repository. I must be missing something. Thank you again.

Download full package, uninstall the previous version and install new version, please. All plugins settings remain untouched.

Regards,
ARI Soft

I uninstalled ARI Smart Contat and reinstalled the new download and I put in the path to the image but it doesn't show up in the tool tip box. I am using the correct syntax? The image does show up in the editor preview.

```
{arijtooltip title="Public Safety Canada" delay="100" extraClass="fancy pretty" top="5" left="5" track="yes"
fixPNG="yes"}{arijttcontent}Public Safety Canada {/arijttcontent}{arijtttext}/{/arijtttext}/{/arijtooltip}
```

Thanks again?

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft
