
Uncaught TypeError: Object # has no method

Posted by alperozgur - 2013/06/30 19:27

Hi;
I'm trying to add JNews Slider to an article. Here is the code that i add to the article.
{arijnewsslider height="450" width="500" useJoomlaArticle="true"
articleItemCount="10" articleCatId="63,64,65,66"}
{ariarticletemplate}
{\$title}

{\$introtext}
{/ariarticletemplate}
{/arijnewsslider}

When i browse to the article it shows a loading panel and nothing happens.
I check the errors by console and got these messages...
GET http://localhost:82/Yeni/JQEASY_JQLIB 404 (Not Found) yemek-menuesue.html:13

Hello,

It seems this is a javascript conflict with a 3rd party extension. Could you send a link to a page where we can see the problem? If it is private, you can send it by email.

Set "Needs jQuery load" parameter to "No" in "ARI Smart Content -> Plugins -> ARI JQuery Loader" plugin settings.
