How to select specific article in JAccordion

Posted by avilovi - 2013/08/02 09:09
_____

Hello,

Is it possible to select a specific article (using article ID) as a content of a specific accordion item in JAccordion? I cannot find how to do it. It would be very useful.

Hello,

See the sample code below:

{arijaccordion width="250" useJoomlaArticle="true" includedArticle="52,47" articleCatId="-1"}
  {articleTitle}{$title|truncate:50:...}{/articleTitle}
  {ariarticletemplate}
 {$title}

 {$introtext}
  {/ariarticletemplate}
{/arijaccordion}

It loads articles with ID 52 and 47.

Regards,
ARI Soft

Unfortunately, this syntax does not work :(
I just see the tags as they are: {arijaccordion width="250" etc...

This code works fine for us. Where we can see the problem?

Regards,
ARI Soft

Strange, but now it works for me too.

Please, complete the description of the plugin. Keyword "includedArticle" and parameter "-1" are not present there, if I'm not mistaken.

Best regards.

Please, could you also give a complete description of tags one can use for article template. For example, how can I display Full Text of the article?

I don't like to mess up my message with too many questions, but:
I'd like to use complete article titles (not truncated) and cannot find how to do it.

Please, could you help me?

_____

You can use the following predefined variables in {ariarticletemplate} and {articleTitle} tags:

   {$id} article id;
   {$title} article title;
   {$introtext} article intro text;
   {$fulltext} article full text;
   {$created} article created date;
   {$modified} article modified date;
   {$hits} article hits;
   {$readmore_link} link to article page.

If you want to show non-truncated title, use the following code:

{$title}

instead of:

{$title|truncate:50:...}

Thank you very much!

Now the only problem remains: the window of the accordion item does not adapt to the height of the article. And my articles have different length...

_____

Add autoHeight="false" attribute to {arijaccordion} tag.

Regards,

ARI Soft
