
jdatatable sort

Posted by domc - 2013/10/04 13:52

Is there a way to turn off the sorting function per column, as I'd like to turn off the sorting for my first column.

The first column including the header is just a series of checkboxes so it doesn't make sense to sort anyway. The header box acts as a checkAll function and all works as it should, except I've just noticed on an iphone display the header checkall box doesn't seem to be selecting when you tap the screen - perhaps because its trying to sort instead.

Many thanks, Domc

Hello,

Currently the plugin doesn't support the described ability. This feature will be added in "ARI Smart Content" v 2.0.

Regards,
ARI Soft
