
Simple Bar Chart

Posted by frederik - 2013/12/17 00:16

Hi all,

how would I go about doing a simple bar chart with the arijdatavisualizer (I'm using an SQL query as a base but that shouldn't matter here)? All the examples I find have more than one dimension (i.e. multiple columns).

<http://www.ari-soft.com/images/fbfiles/images/barchart.png>

cheers
Fred

Hello,

The following plugin code:

```
{arijdatavisualizer type="bar" hideTable="true" width="500" height="400"}
```

Count

2009
2

2010
4

2011
5

2012
6

```
{/arijdatavisualizer}
```

will be rendered as:

<http://www.ari-soft.com/images/fbfiles/images/graph-ab9a8f22845d68fae1bd33fc1ef03f8e.png>

Thanks for the quick response. I got my sql table to your format now (just in case anyone finds this useful).

```
{arijdatavisualizer type="bar" hideTable="true" width="400" height="400"}
{aristable}
  {aristablecolumns}
    {aristablecolumn id="Jahr" alias="Jahr" headCellTag="td" cellTag="th"}
    {aristablecolumn id="Anzahl" alias="Anzahl"}
  {/aristablecolumns}
  {aristablequery}
  SELECT YEAR(birthdate) as Jahr, count(*) as Anzahl FROM joomla_contentbuilder_list_records statelinks,
  joomla_contentbuilder_list_states states, joomla_zp_waitinglist wlist
  WHERE statelinks.state_id = states.id AND states.title = 'Aufgenommen' AND wlist.id = statelinks.record_id GROUP BY
  YEAR(birthdate);
  {/aristablequery}
{/aristable}
{/arijdatavisualizer}
```

However, the style is a bit messed up (probably because my theme resets a lot of basic css). Is there any recommendation on how to proceed? Otherwise I'll have to go through each property to see what is messing up my graph. <http://www.ari-soft.com/images/fbfiles/images/style.png>

Try to wrap plugin code with the following HTML code:

... plugin code goes here ...
