
jtabview not switching tabs

Posted by bettyheim - 2013/12/17 17:48

Hello, I have been working on this site for a while:

<http://qualitymarineofalaska.com/index.php>

I created the home page first and the tabs worked fine with the slideshows as I had turned off loading jquery in the slideshow and the top menu. I just noticed however, that the tabs are no longer working. When I click on the tab, the content does not change. I have upgraded to Joomla version 3.2 and added several other extensions. The extensions that I have added all have loading jquery turned off. I even installed a jquery fixer in case I missed something. None of this has helped. I am wondering if the upgrade to Joomla 3.2 caused the problem. Can you please help?

Hello,

Disable loading of jQuery library for "fancy slider" and disable jQuery loading in "ARI Smart Content -> Plugins -> ARI JQuery Loader" plugin settings.

Regards,
ARI Soft

hmmm.... thought I had done that. Somehow, it must have gotten switched. Thank you so much for your help and quick response! This has been resolved.
