COUNT(DISTINCT SubmissionId) NO alias

Posted by Alexsei - 2013/12/18 18:38
_____

I can not give a normal name fields, writes only the name Selecta
What to do?

BAD
{arisqltablecolumn virtual="false" width="20% id="COUNT(DISTINCT `SubmissionId`)" alias=" >;8G5AB2> 70:07>2"
headerClassName="dda"}
NORMAL
{arisqltablecolumn id="Title" alias=" 0720=85 CA;C38" className="idg"}

SELECT
   COUNT(DISTINCT `SubmissionId`),
 `#_rsformuslugi`.`Title`

==

_____

COUNT(DISTINCT _rsform_submission_values.SubmissionId)

ERROR NAME

HOW TO CREATE NAME TABLE ???????????????

_____

What is "_rsform_submission_values"? If you want to use table name with Joomla! table prefix, it should look like:

#__rsform_submission_values

Regards,
ARI Soft

Alexsei Beluaev,

A new post has been made to a topic to which you have subscribed on the ARI Soft Forum Forum

SELECT
COUNT(DISTINCT `SubmissionId`), BAD NAME TABLE -- ID {arisqltablecolumn virtual="false" width="20%
id="COUNT(DISTINCT `SubmissionId`)"
`#_rsformuslugi`.`Title`

NO ALIAS TABLE NAME alias="myalias name bad")

===

_____

2 select

one BAD table name COUNT(DISTINCT _rsform_submission_values.SubmissionId) AS expr1,

two correct table name
  _rsform_forms.FormTitle

===

Sorry, but it is not clear what problem do you have. Send full plugin code which you use by email please. If any error
occurs send also a screenshot where we can see it.

Regards,
ARI Soft
