My data does not fit in a arijdatatable

Posted by salublumen - 2014/02/06 04:57
_____

Hello I just bought and understand your tool.

I upload my database but it is quite big, the problem its that i cannot view all the table.

{arijdatatable bPaginate="true" bFilter="true" bSort="true" bAutoWidth="true" iDisplayLength=10}

{arisqltable header="true" width=10}{arisqltablequery}SELECT * FROM abarrot2_ventas.LAM001{/arisqltablequery}{/arisqltable}

{/arijdatatable}

And I try to use arijflexgrid but

{arijflexgrid resizable="false" showToggleBtn="true" nostripe="true"}{arisqltable}{arisqltablequery}SELECT * FROM abarrot2_ventas.LAM001{/arisqltablequery}{/arisqltable}{/arijflexgrid}

How can I fix that issues??

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

What is the solution to this problem? I have the same problem.

Thank you in advance,
JM

_____

I use the ARI Smart Content: DataTable Pack.

Please check your email.

Thank you,
JM

_____

The page have a Microsoft SQL procedure. It starts with EXEC and return a table.

If possible check the page again and you have an example "Pending" below were you can see a procedure returning a table wit 8 columns.

The first procedure will return a table with 13 columns. I think that the problem is the size of it, but I can be wrong ...

Thank you for your help.
Regards,
JM

The problem is solved.
The user I use did not had permissions to execute this sql procedure. Now it shows.

I am sorry for the extra work I gave you.
I write the explanation here so everybody that reads this lines don't do my mistake.

Thank you for your awesome help,
JM
