
How to insert the codes of A/SMART into articles ?

Posted by Afrikao - 2010/06/11 19:36

Dear ARI Team,

Due to lack of DETAIL instructions the users asks the simple questions.

Well, the A/SMART purchased and the codes are on pages relating to the plugins included - like Your Plugin

But You can see on my Test website - no success.

Most of all the reply is very simple.

But would be great to know HOW to do that in the right way.

Waiting for Your reply,

=====

Hello,

Plugins code on your page looks correct, could you open 'Diagnostics' page on the component backend and check that it doesn't contain errors? If you can provide temporary access to your Joomla! backend by email, we can investigate this issue ASAP.

Regards,
ARI Soft

Thank You in advance.

Just now I sent to Your email info@ari-soft.com email from Afrikao.com@Gmail.com with access details.

Wishing You the success to resolve the problems with ARI SMART & ARI EXT Menu.

Best regards,

=====

First of all - thanks a lot for the resolving of the problem with ARI EXt menu - I made the changes as per Your instructions and now IT WORKS PERFECTLY !
My positive testimonials will follow soon.

My self-test with JAccordion was also successfull.

But I still have some simple questions regarding using of the plugins - sent to You by email just now.

Thanks in advance for Your comments,

=====
