
DataTable x Datatable Pack

Posted by Alisson Medeiros - 2014/02/24 23:26

I purchased ARI Smart Content: DataTable Pack (\$25) because you said: "This component... It helps to create powerful tables for your Joomla system from HTML table, database data or CSV file. you don't need to find and pay for different Joomla! components for working with data, CSV files and HTML tables."

But now I see references in responses in the Data Table section to configuration type screens that I can't find with DataTable Pack.

I need show table and can load data from databases and CSV files.

How Can I do?

Hello,

ARI Smart Content and ARI Data Tables are two different extensions.

You can use ARI CSV Table and ARI SQL Table plugins to show data from CSV files and databases.

For example if you want to show data from /data/report.csv file, use the following plugin code (place it into an article or other content where you want to show a table):

```
{aricsvtable file="date/report.csv"}
{/aricsvtable}
```

Ok. I can see the table on site now. Thank you.

but How Can I show tables with pagination, filter and sorting?

I would like to load data from CSV files and show table with pagination, filter, and sort with data type detection.

"ARI CSV Table" plugin can be wrapped with a table plugin. For example with ARI JDataTable plugin. Plugin code will look like:

```
{arijdatatable bPaginate="true"}
{aricsvtable file="date/report.csv"}
{/aricsvtable}
{/arijdatatable}
```

and How Can I do customizable and flexible tables?
Customizable row and column with differents colors.
How Can I change the themes?

Thank you

"ARI JDataTable" plugin supports jQuery UI themes and a theme can be selected in "ARI JQuery UI Loader" plugin settings. See "Default JQuery UI 1.7.2 theme" parameter.

How Can I load a table linked to CSV file on Google Docs?

Thank you for your help.

Currently the extension doesn't support this ability. It is supported by "ARI Data Tables" extension.

PS: "ARI Smart Content" v. 2.0 will support ability to load remote CSV files.
