
use with mysql

Posted by tlbellis - 2008/11/20 15:22

Does this product allow my to query data from a mysql database that contains tables from other plugins, such as sobi2?

Thanks for your interest.

Sure, it allows to query data from any table in your MySQL database.

Thanks for the quick reply. Does the query to mysql require a good deal of knowledge of mssql on my part, or is there some built-in tools to help code the query to make it more user friendly? I'm not very proficient in coding.

Using this plugin requires SQL knowledge to write an appropriate query. [More description here.](#)
