
Help with a table

Posted by dodu.petrescu - 2010/06/20 11:39

Hi,

Could you please help me with a table? I need Search and First, Previous, 1,2 Next Last buttons...just like in <http://smart.ari-soft.com/ari-jdatatable.html>. Also, the header is too high (id, Titulatura, Nume etc..)and the drpdwn with the no of pages is not in line with the page you are in box (1/254) .

You can login to <http://testweb.umf.ro/umf/administrator> - the article is PROFI TEST 5.

You have the username and password, sent in a previous email.

Do you have a strong documentation for this component? A pdf file maybe?

The code is :

```
{arijtablesorter paging="true" pageSize="5" pageList="10,20" showFirst="true" showPrev="true" showNext="true" showLast="true" zebra="true" defaultSorting="1:ASC" } {aristable} {aristablecolumns} {aristablecolumn id="ID" alias="ID" width="5%" height="50%" className="idg"} {aristablecolumn id="Titulatura" alias="ID" width="10%" height="20%" className="idg"} {aristablecolumn id="NAME" } {aristablecolumn id="NAME" headerClassName="head"} {aristablecolumn id="Prenume" } {aristablecolumn id="Prenume" headerClassName="head"} {aristablecolumn id="Funcție" } {aristablecolumn id="Funcție" headerClassName="head"} {/aristablecolumn} {/aristablecolumns} {aristablequery} SELECT id AS ID,titulatura AS Titulatura,nume AS Nume,prenume AS Prenume,functie AS Funcție FROM #__profi {/aristablequery} {/aristable} {arijtablesorter}
```

Kind regards,
Dodu <http://www.ari-soft.com/images/fbfiles/images/test.JPG>

Hi,

Could you please help me? I tried using the next page parameters and it did not work. Also, I don't know how to add the search.

Hello,

Sorry for delay, if you want to create table like <http://smart.ari-soft.com/ari-jdatatable.html> , use 'ARI JDataTable' plugin instead of 'ARI JTable Sorter'. We have added to your article 'ARI JDataTable' plugin that you can see difference with 'ARI JTable Sorter'. We have also fixed header in table, it was a conflict with template CSS rules.

Regards,
ARI Soft

Hi again!

Sorry to bother you again but I have encountered one more problem. After entering all the reords it seems that the component freezes after doing a double sort after a column header.

Processing... remains on and there is a javascript error on page:

Webpage error details

Hi,

I found another issue on mozilla. Can it be fixed on both IE and Mozilla at the same time?

Thank you so much. <http://www.ari-soft.com/images/fbfiles/images/mozilla.JPG>

I re-posted the "'jQuery.fn.dataTableExt.oSort' is null or not an object" JavaScript error as a separate posting, here.

Hello,

It seems this issue was resolved.
