
No CSV Data Table in Article or Modul

Posted by DerSchlachter - 2014/06/01 06:00

Hello,
i bought the following Component "ARI Smart Content: DataTable Pack v. 1.9.1". Joomla!-Version is 3.3.0 and the Installation works fine, no problems, but if i use the code below it display no tables in my content. I tested in "normal" articles and K2 Articles

I deactivate the editor, and i used different CSV Tables, no positive results.

```
{aricsvtable file="../images/documents/Test.csv"}
{aricsvtablecolumns}
{aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
{aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true"}
{coltemplate}{$NAME} - {$ID}{/coltemplate}
{/aricsvtablecolumn}
{/aricsvtablecolumns}
{aricsvtablecolumnspan row="-1,0,2,4" startIndex="0" endIndex="3"}
{/aricsvtable}
```

Next Problem: The i want to add a css Template the screen toggled to plain white/blank?

Is it possible to explain that? Sorry about my bad english.
Best Regards

=====

Hello,

1. If your CSV file is located in /images/documents/Test.csv folder, use the following plugin code:

```
{aricsvtable file="images/documents/Test.csv"}
{/aricsvtable}
```

2. We will check the problem with "CSS Templates" and report about results soon.

Regards,
ARI Soft

Thank you for your fast replie! I had insert the code you posted, after that i get the following Bad Request

0 - PHP regular expression limit reached (pcre.backtrack_limit)

I complemented it this way

```
{aricsvtable file="../images/documents/Test.csv"} {/aricsvtable}
```

But it will show no Data Tables

Best Regards

I followed the instruction in your mail, but there are no changes. Still no table in Article and the same Problem with CSS Tempaltes. I send you a email!
Best Regards
