
ARI CSV table + Jdatatable theme

Posted by ICARUS - 2010/06/23 07:55

Hello

I am struggling a bit in customizing the theme.

I have 3 questions where I hope you can help me further (look screenshot) :

- 1) how can I change the text colour i the top bar ?
- 2) how can I add lines on left and right side of table ?
- 3) how can I change line colour ?

<http://www.ari-soft.com/images/fbfiles/images/screenshot.jpg>

Thanks a lot in advance for your help !

Best regards

Robin

Hello,

Open 'CSS Templates' page on the component backend and create new 'CSS Template' with the following code:

```
/* Define the text color of the top bar */
DIV.dataTables_wrapper DIV.ui-widget-header
{
    color: red;
}

/* Define background of each odd row in a table */
DIV.dataTables_wrapper table.display TR.odd TD
{
    background: red;
}

/* Define background of each even row in a table */
DIV.dataTables_wrapper table.display TR.even TD
{
    background: green;
}

/* Adds right and left borders to table */
DIV.dataTables_wrapper table.display
{
    border-left: 1px solid gray;
    border-right: 1px solid gray;
}
```

Regards,
ARI Soft

Thanks for the amazingly quick answer, thanks.

Just 2 minor questions :

- 1) title on top bar is still grey and not red as put in CSS. Any idea why ?
- 2) how can I change line colour on sides ? f.ex. "border-left: 1px #d1d1d1;"... is not working.

Regards

Robin

Could you provide link to page where we can see 'ARI jTable' on your site? It helps us investigate this issue, probably it's conflict with site template styles.

Regards,
ARI Soft

Open 'CSS Template' which you have created, remove the previous code and place the following code, please:

```
/* Define background of each odd row in a table */
DIV.dataTables_wrapper TABLE.display TR.odd TD
{
    background: #FFF;
}

/* Define background of each even row in a table */
DIV.dataTables_wrapper TABLE.display TR.even TD
{
    background: #e2ebfa;
}

/* Define the text color of the top bar */
DIV.dataTables_wrapper DIV.ui-widget-header DIV
{
    color: red;
}

/* Adds right and left borders to table */
DIV.dataTables_wrapper table.display
{
    border-left: 1px solid #D1D1D1;
    border-right: 1px solid #D1D1D1;
}

DIV.dataTables_wrapper
{
    margin: 0 1px;
}

DIV.dataTables_wrapper DIV.ui-widget-header
{
    margin-left: -1px;
}
```

Thanks, works like a charm.

I just remarked 1 more thing.
Rounded corners of table show up nicely in Firefox but not in IE.
Any solution for this ?

This is problem of IE because it doesn't support CSS 3, but 'ARI JDataTable' uses 'border-radius' CSS property for creating rounded corners.
