
Smart Content IE11 Problems

Posted by chicok40313 - 2014/07/22 13:15

On my website I made some sortable tables. Everything looks good in FireFox, chrome..., but in IE11 the table shows only head- and foot-row when I set paging to a number. If I set paging to 'false' it looks o.k. I can make it work, when I set the compatibilty-mode of IE11 to my site.

You can look to the site here, the top table is set to paging="false" and the bottom table ist set to paging="5". You have to use IE11 in normal mode to test it.

So can you give me a hint, how to solve this problem ?

Regards

Jens Knoblauch

Hello,

Update the extension to the latest version and clean browser's cache.
