
JAccordion Not Working

Posted by CSSDAweb - 2014/07/31 17:31

I'm using ARI Smart Content, and have it working for a data grid, but can't get the JAccordion to work. I'm running Joomla 3.3.3 with JQuery enabled. I've copied to demo code into an ARI module, but all I get are the three test items as text. There is no accordion action, just the titles and content displayed like an outline. Clicking on the title doesn't change anything.

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft
