
Smart Book and Lightbox from Smart Content Product

Posted by jemka - 2014/09/07 19:37

Hi everybody,

i bought Smart Book and Smart Content and
i cannot configure Smart Book to use a lightbox from Smart Content.

There are the options, ARI Fancybox, and ARI Sexy Lightbox.

But when i use one of them:
ARI Smart Book: "System - ARI Fancybox" plugin isn't installed.

Plugin "ARI Smart Content - Fancybox" is activated.

Thanks for helping, jemka.

Hello,

"ARI Smart Book" can be integrated with ARI Sexy Lightbox and ARI Fancybox extensions. Currently it doesn't support integration with "ARI Smart Content - Integration - ARI Sexy Lightbox" and "ARI Smart Content - Integration - Fancybox" plugins from "ARI Smart Content" extension. We will add support of these plugins in a future version of the extension. It will be ready within a week.

Regards,
ARI Soft

Hi,

within a week sounds great.

Thank you for your quick usefull reply, jemka.

Hello,

Upgrade "ARI Smart Book" to v. 1.5.1. It supports integration with "ARI Smart Content - Sexy Lightbox" and "ARI Smart Content - Fancybox" lightbox applications.

Regards,
ARI Soft
