
GChart with Tabs and/or Accordion

Posted by dirmel - 2014/09/18 14:33

Hi, the Tabs plugin (in a module position) and the Accordion plugin (in an article) is on my homepage (ssv-ueberherrn.de) and it works. But now i enabled a GChart module on the same side and the Tabs and the Accordion do not open. So i had to disable the GChart again...

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft

<http://www.ssv-ueberherrn.de/>

Tabs are above NEWS, but they do not work because GChart (left sidebar) is enabled.

This problem occurs because several versions of jQuery library are loaded on your site. Load jQuery only once. This problem can be fixed if use "JS Plant" or "Easy jQuery" plugin. We can help to configure the extension if you provide a temporary access to your J! backend by email.
